Added functionality to create a new lecturer:

- **GET /lecturers/add:** Displays a form to input Lecturer ID, Name, and Department ID.

- **POST /lecturers/add:** Validates inputs and saves the new lecturer to the MongoDB.

- **Redirects** to the Lecturers Page if successful.

- **Displays** validation errors directly on the form.

- **Navigation:** Added a link to the "Add Lecturer" page on the Lecturers Page.

Use of express-validator

express-validator is used throughout the code to validate user inputs before form submission.

- Students: Validates Student ID (length), Name (minimum characters), and Age (minimum value).

- Lecturers: Validates Lecturer ID, Name, and Department ID (minimum characters).

Validation errors are **displayed** directly on the form.
